Pages Crawl Depth

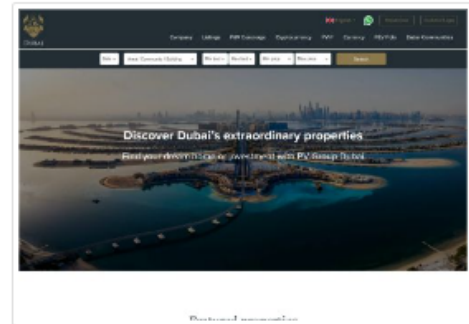

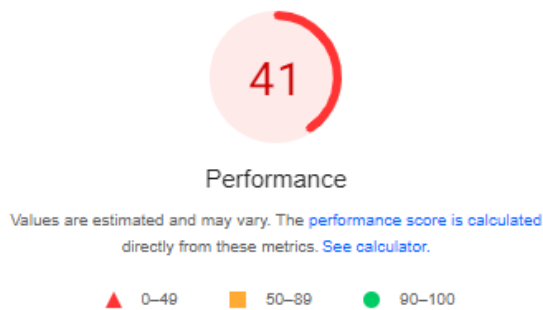

- 2) **Page Speed:** Mobile performance and Desktop performance speed are low - Every second counts when a visitor is waiting for your site to load - speed affects the visitor experience on your site. Page speed is also a factor that affects your position in search engines. Hence, site speeds lead to better rankings and more sales.

Mobile Performance Our mobile performance is 17%, it's not good. We need to improve our site performance to above 75% for mobile users.

Mobile Performance Our mobile performance is 41% out of 100%, site performance is not that good. We need to compress our site images and site structure to make the site SEO compatibility and faster for users.

Page Speed Insights

- 3) **Duplicate Content Issues:** We have found 2 pages have duplicate content issues, Google is confused about which is on your main page. So, they should fix it. It's very important for rank on the SERP.

Site Traffic:

We found from our site last month's Avg traffic visits were 240 which is not a good traffic. Most of the traffic coming from the spammy backlinks. So need to work target keyword with LSI keywords, Long tail Keywords and KGR keywords. Then develop a content plan that is better than my competitor's and optimize perfectly keyword focusing. It will help us to increase our traffic.

Organic Keywords:

We found lot of keywords but they are not ranking on the Google first page. It's because we do not have the keywords related to our topics/services. That's what Google doesn't like. When Google reads our site. Google does not find any keywords related to the services/topics. This is why our sites keywords are not ranking. We need to work on well ranked and our service related keywords.
